A rough drawing of your space is useful and will help us with the design process. See below for a sample floor plan. Once you have dimensions and a basic sketch of your space, transfer the information to the grid on the next page. Here are some helpful hints to get you started.

Tips for Measuring Your Space

- Use a pencil to facilitate easy changes
- Measure in inches only
- Be sure to note all fixtures and utilities (with dimensions)
- · Also note all electrical outlets/switches (with dimensions)
- Include location and size of windows and doors
- Note the size and location of existing appliances
- · Indicate which way doors swing and into what rooms
- · Breaks in walls and obstructions should also be noted
- Denote ceiling height and indicate any transitions, soffits and/or vents

How to Measure Windows and Doors

Measure each door and window and record in the grid below. Measurements should be from the outside edges of the window/door – trim to trim. All dimensions should be in inches.

	Measurement A Width of door	Measurement B Height of door
Door 1		
Door 2		
Door 3		
Door 4		

	Measurement A Floor to underside of window sill	Measurement B Underside of window sill to top of window molding	Measurement C Top of window molding to ceiling	Measurement E Window width from outside molding to outside molding
Window 1				
Window 2				
Window 3				
Window 4				

515 N Lake St Mundelein, IL 60060

Draw your floor plan here. Remember that a great design hinges on precise measurements. Save time and money on your project by recruiting the professionals to measure your space before cabinetry and other room elements are purchased. Scale: 1/2" equals one foot, or each small square equals three inches.
