How to Measure Guide

Example

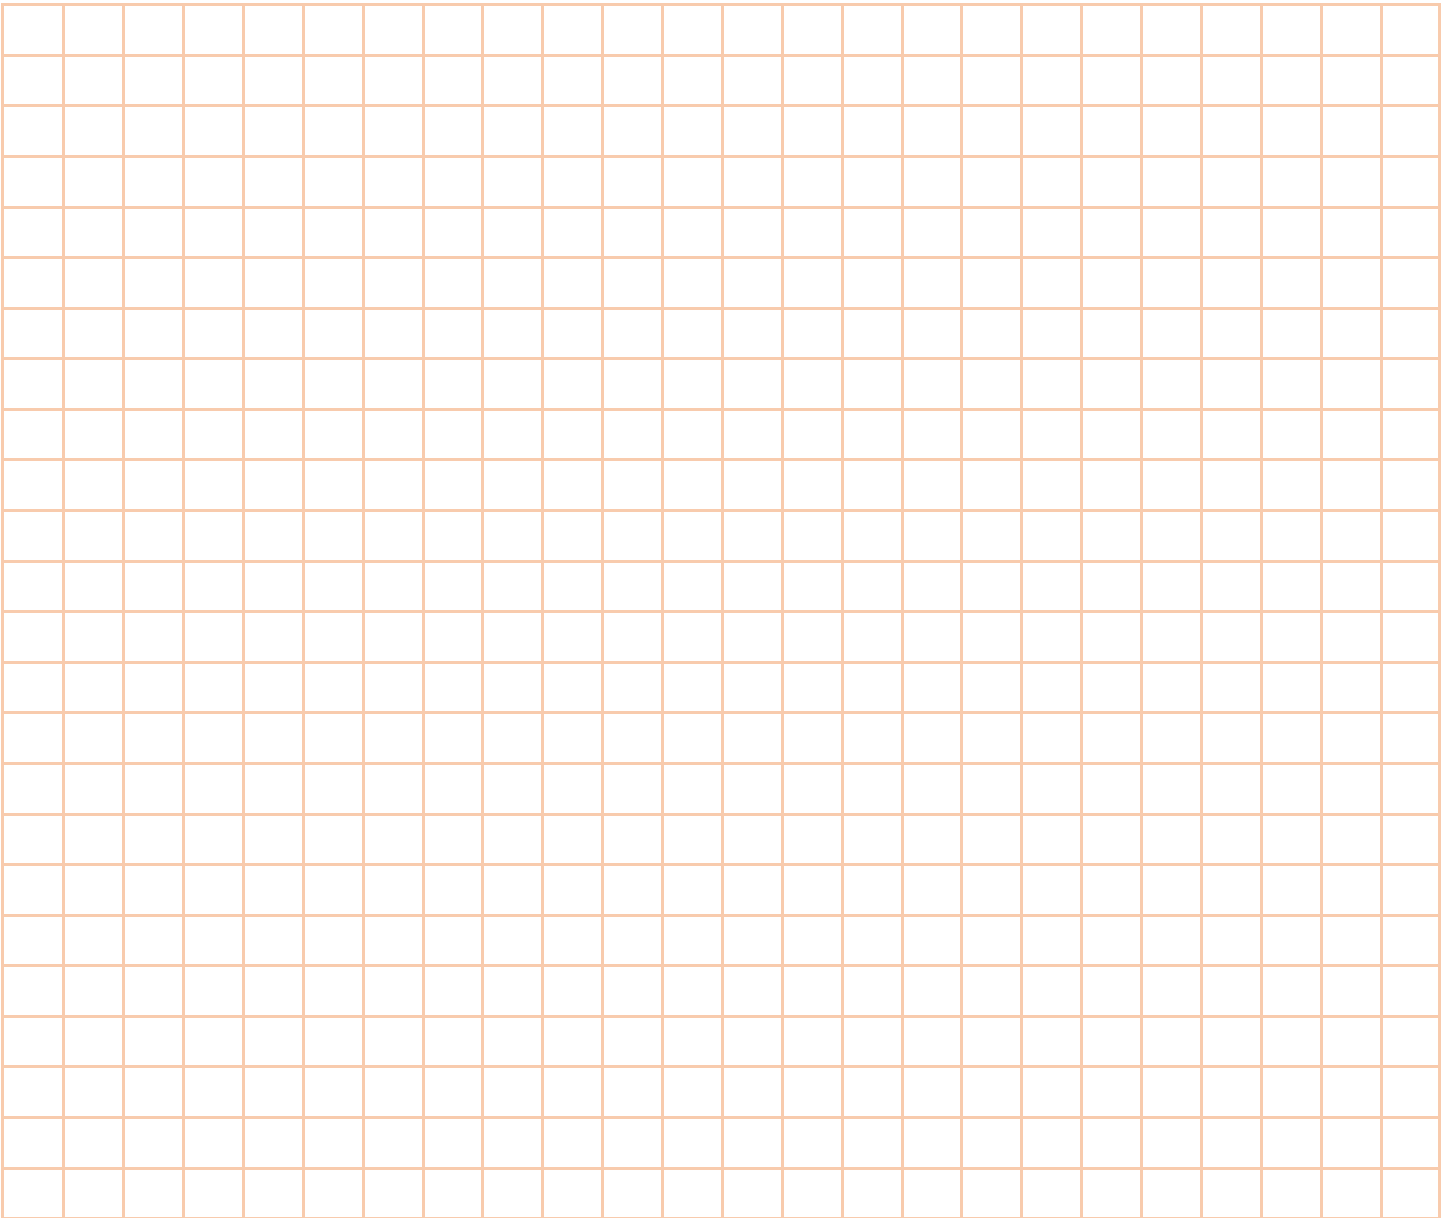

Tips:

1. Measure from the outer most edge of trim on windows and doors to the opposite outer most edge.
2. Exact dimensions will ensure a proper fit of your Cabinetry order.
3. Have someone help hold the tape measure for hard to measure areas.

Use the graph below to enter walls, windows and doors, dimensions and locations.

Measure in inches only to the closest 1/16 of an inch.

The above graph is for notes and dimension help and is not to any specific scale.

Appliance	Model #	Height	Width	Depth
